DIVE SYSTEMS SERVICE & TESTING

Pro-Diving Services provide quality service and repair work to diving equipment, including cylinder inspection and hydrostatic testing.

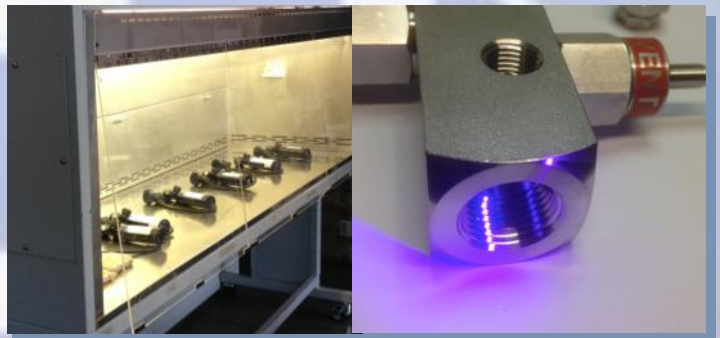

Whether it be a dive regulator, BCD, full face mask, dry helmet or a specialised piece of equipment, the PDS service team caters for all divers and industries including recreational, commercial, research, military, law enforcement, rescue, and industrial.

PDS are a **fully approved Gas Cylinder Test Station** (since 1979). Services include internal cleaning and valve servicing. Support spares are on hand for most valves and in some cases we can machine specific parts that are no longer available.

The PDS Facility is fully equipped with a combined test station, light machining capability, service support rooms and a Laminar Flow Bench for specialised service requirements.

Large, temperature controlled, ultra-sonic baths are used to ensure a high standard of cleaning for all breathing apparatus and life support systems.

Pro-Diving Services ensure divers get the type of service they expect with the equipment their lives depend upon.

With our strict work procedures, combined with an ISO9001:2008 Quality Management, customers are assured of quality work and a full documentation trail for their equipment.

Our service department, test station and support facility undergoes annual external audits to ensure high standards and excellent service.

Safety and quality are our number one priority
